"How is the full version planned to differ from the Beta version?"Every feature in the full version will appear during the Beta process as we develop them.. Upcoming Features Tools upgrades:More layers options, transformation tools, new controllers nodes…New features:Symmetry and duplicate tools, tile tools to loop strokes over the edges of the picture.. Take advantage of this offer before Black Ink is complete!Why Beta?"In order to achieve this we chose to put Black Ink in the hands of the users as soon as possible to gather feedback, adapt our development to their needs and also help us finance the project while staying independent.. We also aim at releasing on OSX You can see a detailed list of planned developments here"What is the current state of the Beta version?"Black Ink is fully functional and each update is tested and stable.

Purchase now with a huge discount, and receive all future updates for free!A lot of great features are in development for Black Ink and the special beta offer will evolve as they come in.. And thanks to Black Ink's GPU technology you can forget about the pixels and work on high definition documents.. You can create the perfect brush, or the most crazy one, and share it with other users for unlimited variations and effects.. Black Ink's non realistic tools makes creating original pictures fast and easy, whether you're an experimented artist or never used a painting program before.. We are planning on adding more options to brush creation and even a way to mix them together, more drawing tools like symmetry and cloning, better management of layer number, and other improvements asked by the community. ants performance profiler 9 keygen photoshop
